PRODUCT OVERVIEW | OCTOBER 2026

Buying a car still takes too many steps

Many showroom visits

Buyers travel to see, compare and ask the same questions again and again.

Unclear final price

The number on the brochure is rarely the number on the bill.

Test drives by phone

Calls, callbacks and waiting just to fix a time to drive.

Every extra step is a chance for a serious buyer to give up. We remove the steps.

VirtualDrive is a digital showroom for your cars

1 Discover

Find the right car by budget, fuel and body type

2 Explore

Price, specs, brochure, 360° view and colours

3 Try

Book a test drive at a time and place they choose

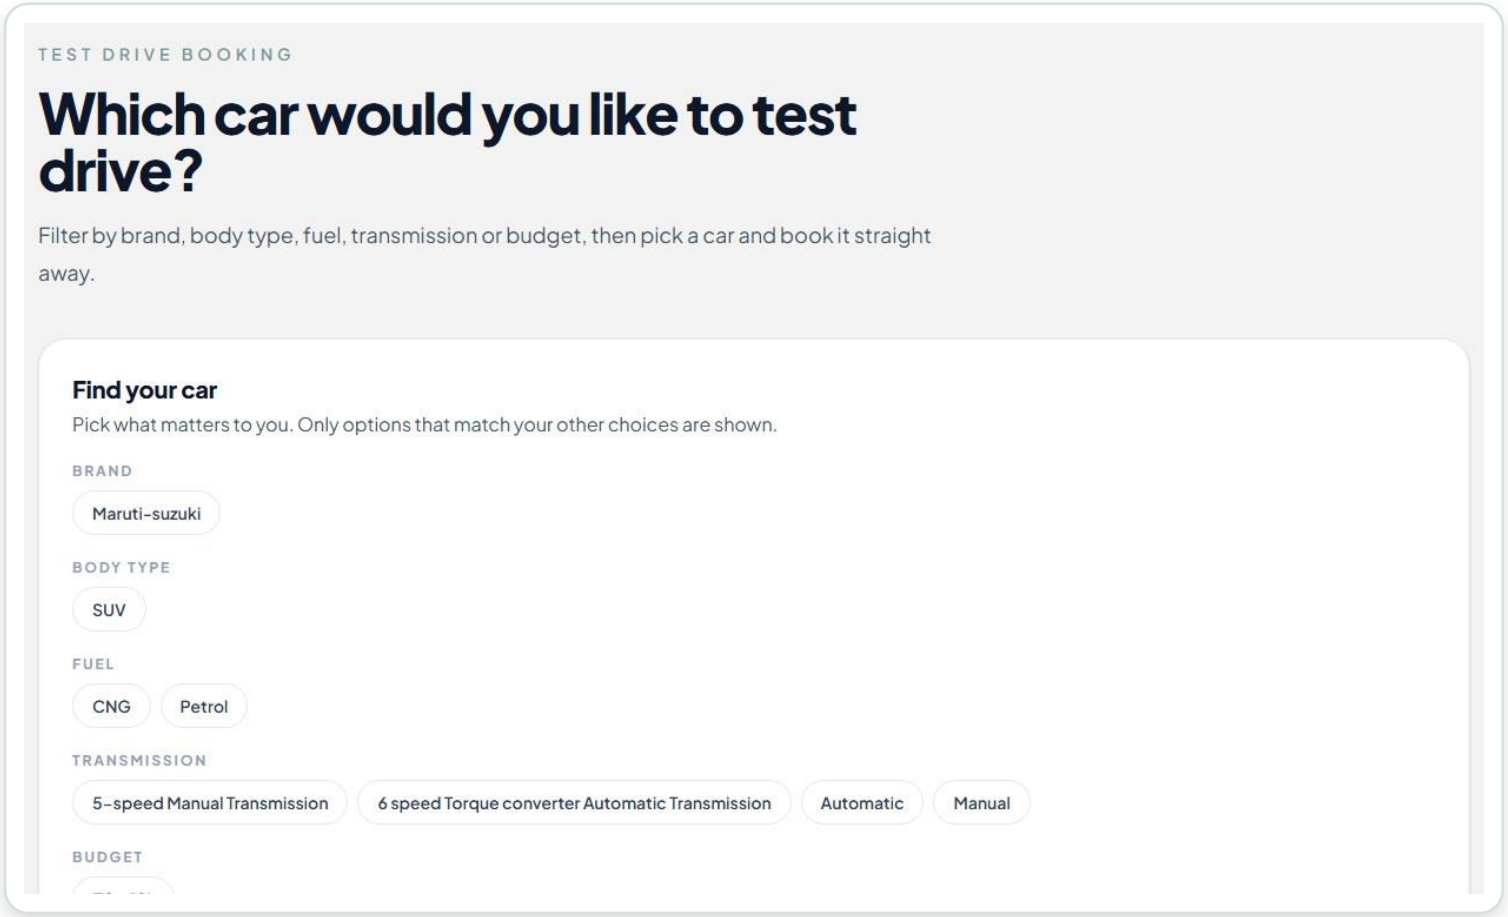

4 Book

Reserve the car with a small online payment

All of it online, from a phone or laptop, at any hour. Let's walk through what the customer sees.

Step 1: Find the right car in seconds

Pick what matters

Brand, body type, fuel, transmission and budget.

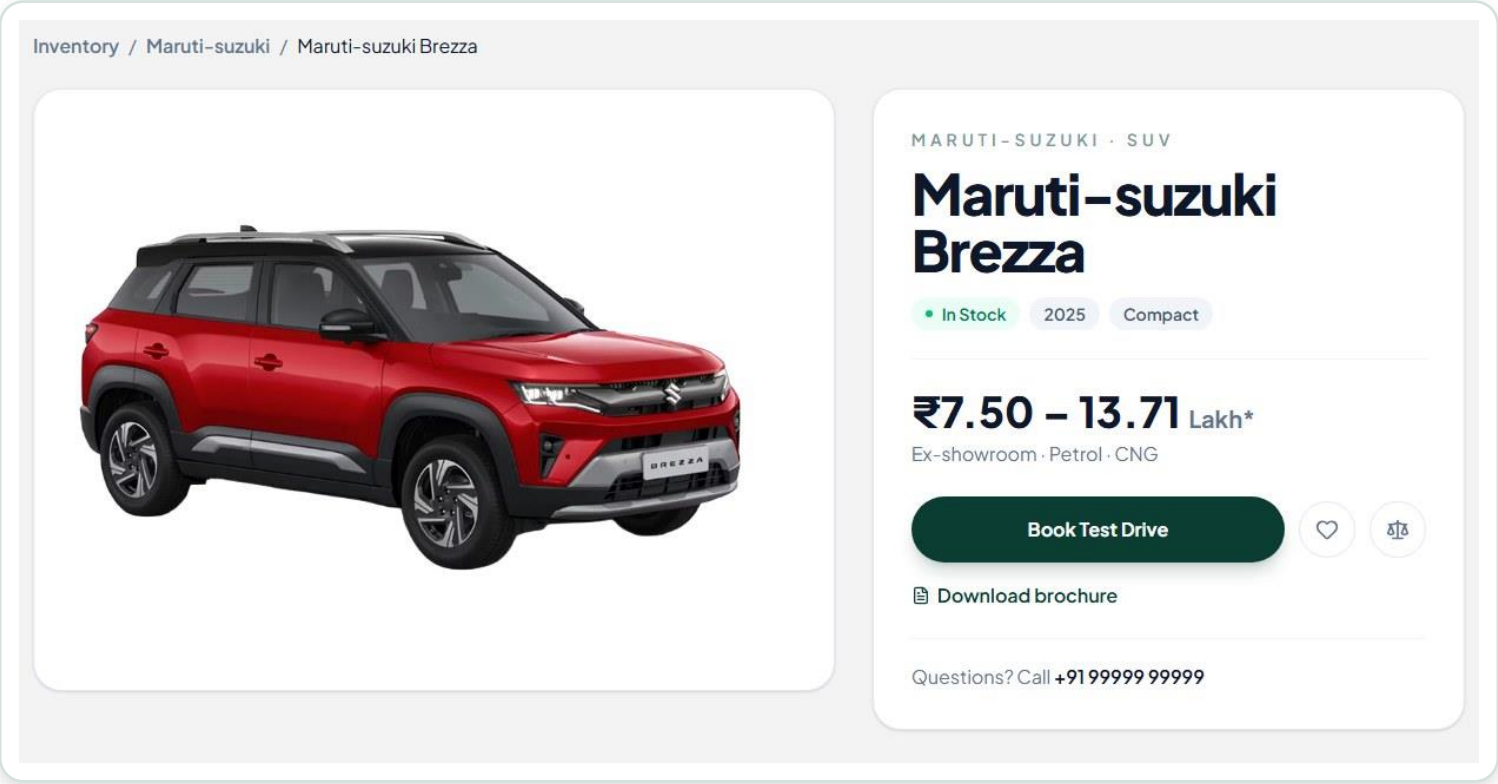

No dead ends

Only options that match their other choices are shown.

Straight to booking

From the result, one click to book a test drive.

Step 2: See the price, the details and the brochure

Clear pricing up front

Price range and fuel options at the top of the page.

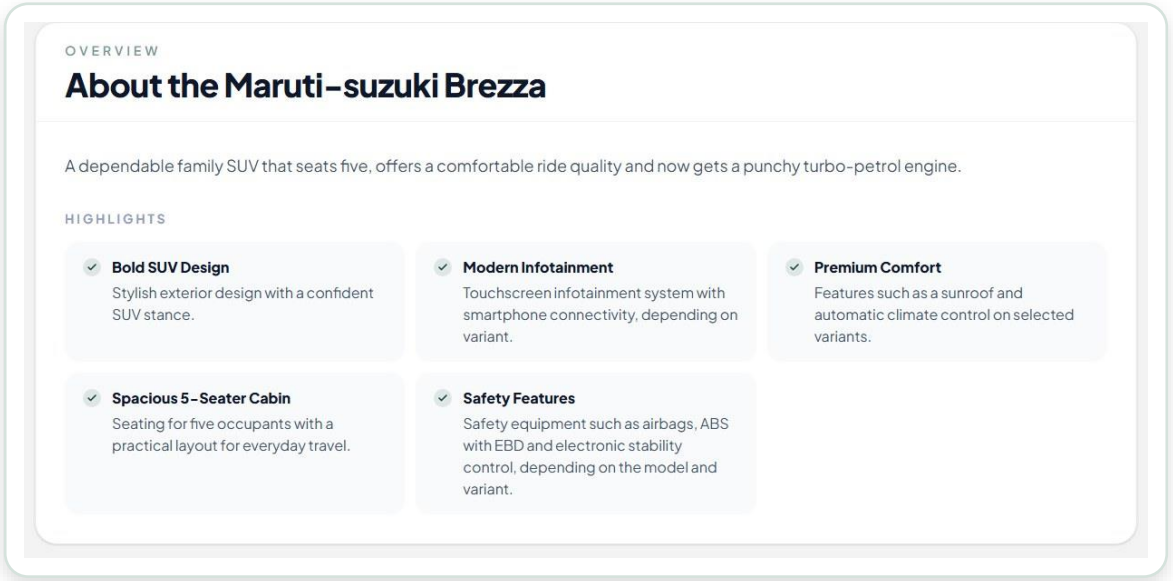

Availability at a glance

In-stock status and model year.

One click to act

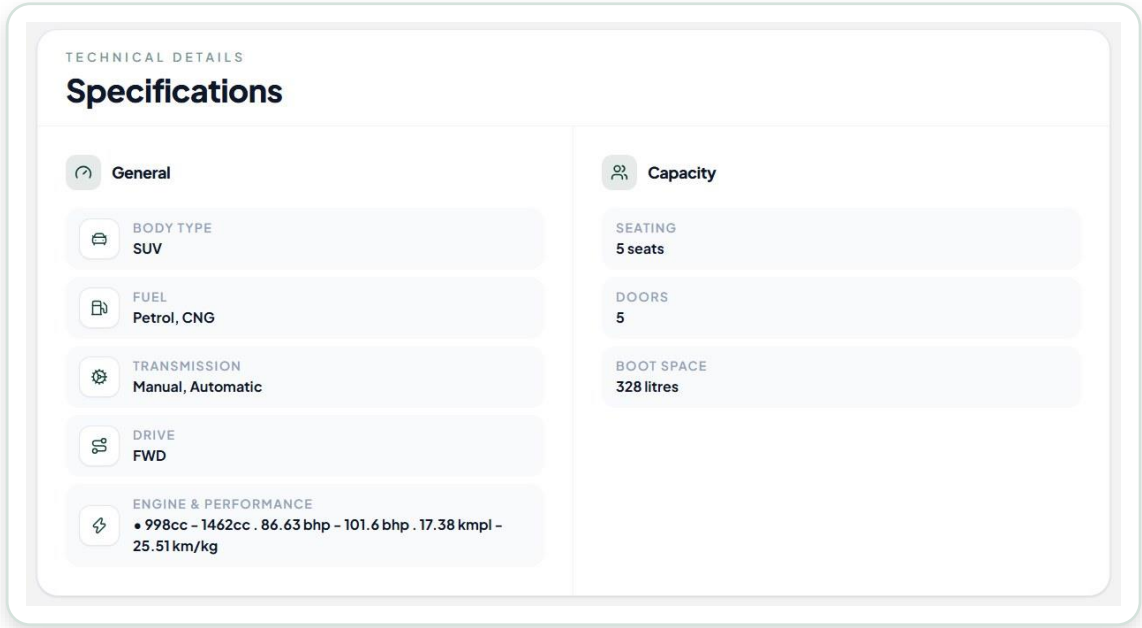

Book a test drive or download the official brochure.

Every question a buyer has, answered on one page

Highlights in plain language

Short, readable reasons to love the car, written by your team.

Specifications and variants

Fuel, transmission, seating, boot space and every variant with its price.

Walk around the car without leaving home

Spin it 360°

Customers drag to turn the car and see every side, inside the page.

Try any colour

They pick a colour and the car repaints on screen, including two-tone roofs.

Fewer surprises

Buyers arrive at the test drive already in love with the car.

Browse freely, log in only when you commit

1

Anyone can browse

Cars, prices, brochures and the 360° view need no account.

2

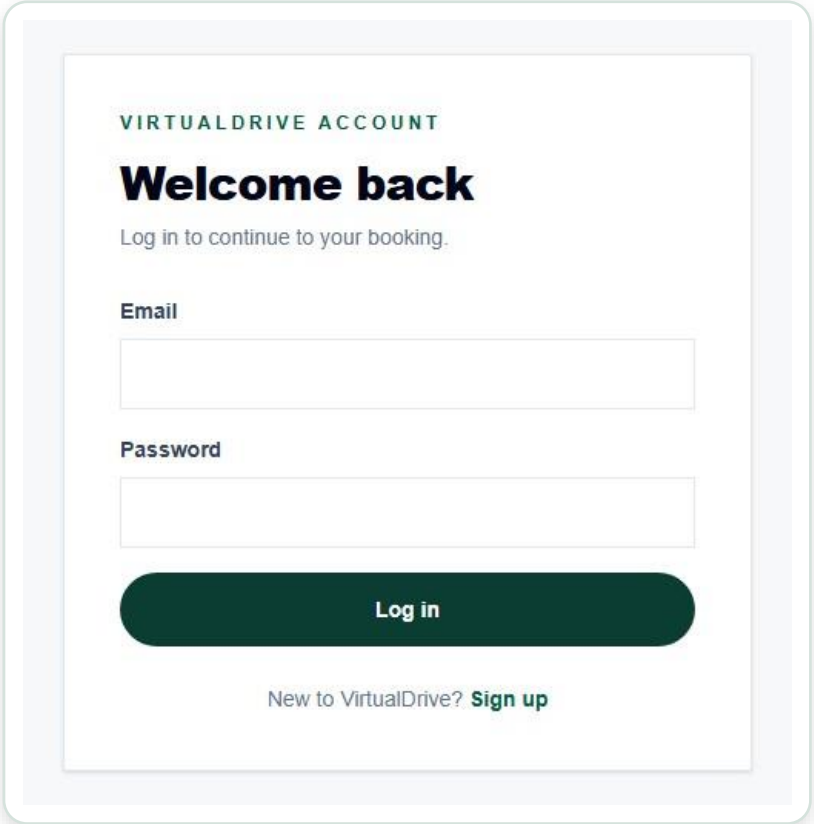

Asked to log in at the right moment

When a customer goes to book a test drive or reserve a car, they are asked to log in or sign up first.

3

Then carry on booking

With an account, they continue straight into their booking.

Every booking belongs to a real customer account.

Step 3: Book a test drive in under a minute

Log in

A quick account keeps bookings safe

Choose the car

Model and variant they want to drive

Pick a slot

Date, time, location and phone number

Get a reference

A booking number confirms it instantly

What your team receives: the customer's name, phone number, chosen car, date, time and location, all saved together under one booking reference. A customer cannot book the same variant twice, so there are no duplicate requests.

Step 4: Reserve the car with a small online payment

Choose the variant

Exact model, fuel and colour

Pay a small booking amount

Securely, through Razorpay

Payment is verified

We confirm it before anything is saved

Booking confirmed

The customer gets a reference number

Committed buyers, not casual enquiries. A customer who has paid a booking amount is serious. The same variant cannot be paid for twice by the same customer, and the system checks this before any money is taken.

Why buyers choose to buy from us

Typical dealership

Higher processing charges

Add-ons and accessories bundled into the bill

Large advance and negotiation at the showroom

VirtualDrive

Zero processing cost

The car direct from us, as it is, without dealer add-ons

Pay only a small booking amount, online

TO BOOK YOUR CAR

₹10,000

is all it takes. Processing cost: ₹0.

Buy directly from us, at the lowest cost. No dealer processing fee, just ₹10,000 to book.

Secure payments, powered by Razorpay

Card details stay with Razorpay

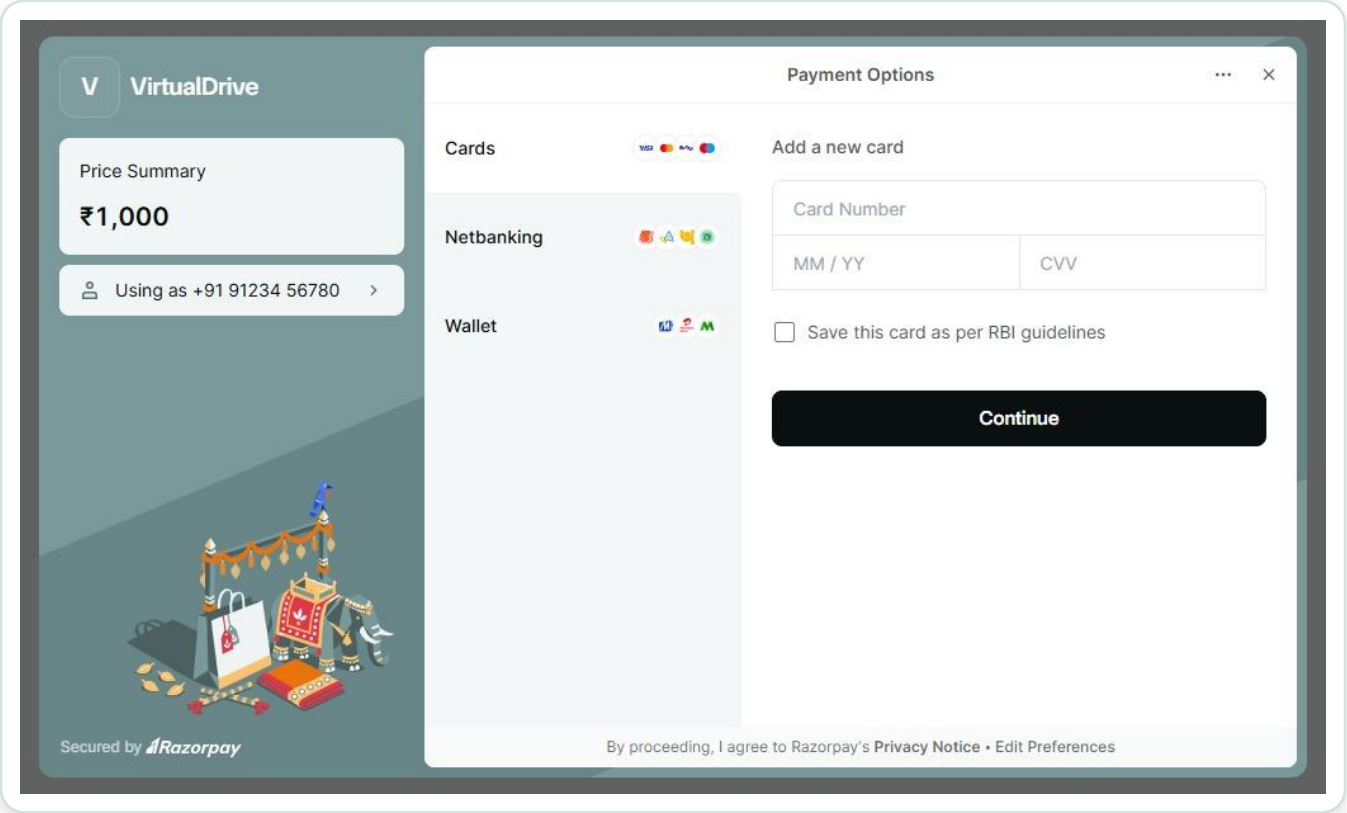

Customers enter payment details in Razorpay's own secure window. VirtualDrive never sees or stores card numbers.

Verified before it counts

We check Razorpay's confirmation of the payment before a booking is saved.

Familiar ways to pay

Cards, net banking and wallets, in a screen customers already know.

Razorpay's checkout in test mode: no real money moves in the demo

How the information flows, in plain words

3 And back again. When a customer books a test drive or reserves a car, that booking is saved in the same secure database, tied to their account.

How your team puts cars online

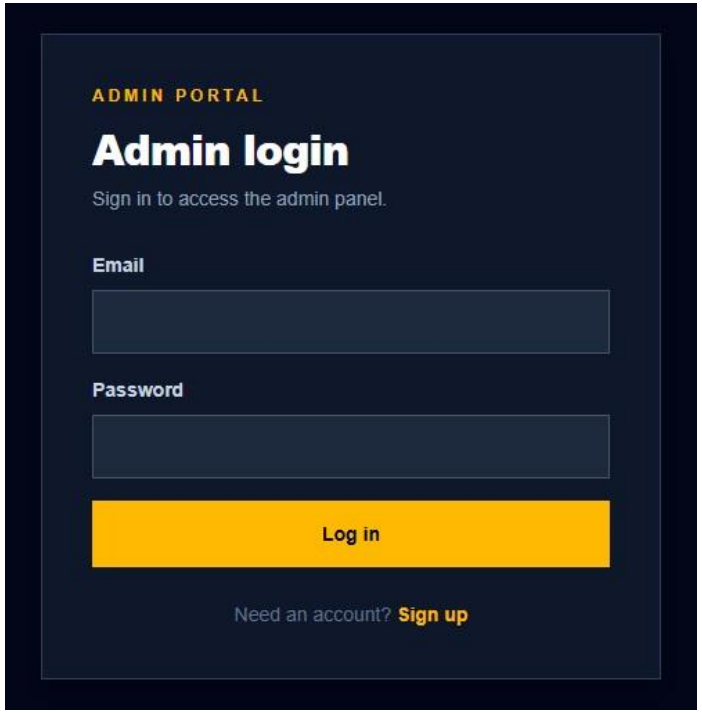

Brand — The manufacturer: name, logo and history

Model — For example Brezza: photos, specs, highlights and brochure

Variant — For example ZXi: fuel, gearbox and price

Sub-variant — The exact engine, paint and every colour on offer

Added step by step, from the brand down to the exact configuration.

Admins sign in on their own secure login, and can log out any time from the top bar.

Your team stays in control of what customers see

Brand and line-up

Your logo, history and the models you want to list

Models and details

Descriptions, highlights, dimensions, photos and brochures

Variants and prices

Each variant, its fuel, gearbox, colours and price

Publish or hide

Switch a model on or off without deleting it

You decide

- Which models appear
- What the price says
- Which photos and brochure customers see
- When a model goes live

What your brands get from VirtualDrive

A showroom that never closes

Your full line-up, open to buyers at any hour, with the same quality of presentation for every model.

Complete, ready-to-call requests

Name, phone, car, date, time and place for every test drive. Nothing to chase.

Serious buyers

Online booking payments separate real intent from casual browsing.

Full control of your brand

You set the models, prices, photos and brochures. We never change them.

A simple way to start

1

Agree

JM & TM approve listing their models on VirtualDrive

2

Load the catalogue

Photos, specs, variants and brochures added for your review

3

Pilot launch

A small start with selected models to see it working

4

Go live

Open the full line-up to customers

Coming next: a booking dashboard and reports for your sales team, so every request and reservation can be reviewed in one view.

Future scope: the full product

1. **A more professional, user-friendly interface**
   A cleaner, more polished design that is easy to use on every phone and laptop.

2. **Exact specifications for every selected model**
   Full interior and exterior details added for each and every car we list.

3. **New bookings alert the admin**
   When a customer books a test drive or buys a car, the saved details appear on the admin dashboard as a new, unchecked notification.

4. **Instant notifications for customers**
   When a customer makes a booking, a notification pops up on their side straight away.

Let's put your brand in front of more buyers

We would like your permission to list and sell your company cars on VirtualDrive.
